

general information

For over 25 years, the ACM International Conference on Supporting Group Work is a premier venue for research on Human Computer Interaction (HCI), Computer Supported Cooperative Work (CSCW), Technology-Enhanced Learning (TEL), and Socio-Technical Studies (STS). GROUP 2014 continues on Sanibel Island, FL, USA.

GROUP 2014 continues the tradition of being truly international in both organizational structure as well as participants, and key for the program is to encourage and facilitate researchers within HCI, CSCW, TEL, STS to interact across disciplinary interest.

We are open for a plurality of research communities and different methods, and are looking forward to the latest findings within broad areas such as technology, society, and human interaction in different types of work practices and learning including organizations, home, healthcare, and leisure.

GROUP 2014 seeks to bring together researchers and practitioners from different areas working on the development, introduction, management, deployment, and analysis of computer-based collaborative systems. We particularly encourage submissions and participation from industry.

conference topics

- Supporting group work
- Organizational issues of technology design, use, or adaptation
- Emerging technologies in work, home, leisure, entertainment, or education
- Theoretical concepts about key concepts relevant for CSCW, HCI and TEL
- Cross-cultural collaboration
- Learning at the workplace (CSCL at work)
- Social computing and contexts of collaboration
- Mobile and wearable technologies in collaboration
- New forms of internet behavior, including Social Media and MOOCs
- Computer supported collaborative learning
- Global collaboration, Online communities
- Strategies for business use of technology
- Innovative collaborative technologies
- Technical architectures supporting collaboration
- New tool/toolkits for collaborative technologies
- Coordination and workflow technology
- Cooperative knowledge management
- Innovative forms of human computer interaction for cooperative technologies
- Ethnographic studies
- Socio-technical studies
- Socio-technical studies of computing

submission types

GROUP14 provides different venues with different types of interaction between presenter and audience. Sessions are a key start for communicating your research. We offer informal breaks, lunch and dinner to continue networking. Get involved in Group's intellectual community!

Papers

The papers venue provides 30 minutes to present and interact with the audience. Accepted papers will be published in the Conference Proceedings and ACM Digital Library.

Working papers

Authors of WoPs will get a 10 minutes slot to present and initiate conversation with attendees. The goal is to launch potential conversations that improve the working paper.

Posters/Demos

Posters and demos are an interactive opportunity. Posters and Demos are presented during a reception with the opportunity for attendees to focus on specific poster/demo topics. As well, the audience will vote on the TOP 3.

Workshop proposals

Workshops provide an informal and focused environment for the information exchange and discussion of Group related topics. We offer half or full day workshop venues.

Doctoral Colloquium

It provides a forum for sharing ongoing Ph.D. projects of participants who wish to join the competitively advanced Ph.D. students with distinguished faculty for mentoring and feedback.

important dates

13 Feb. 2014: Papers

11 April 2014: Working papers, Workshops and Posters/Demos

25 April 2014: Notification of Papers and WoPs

09 May 2014: Notification of Workshops and Posters/Demos

9-12 November 2014
ACM Group Conference

Group2014 is in cooperation
with ACM & SIGCHI
