CALL FOR SUBMISSIONS - SECOND WAVE RESEARCH PAPERS - GROUP 2020
ACM International Conference on Supporting Group Work
January 6-8, 2020, Sanibel Island, Florida, USA
https://group.acm.org/conferences/group20/

We are issuing a Second Wave call for Research Papers for publication in a second GROUP special issue of Proceedings of the ACM (PACM) journal and presentation at GROUP 2020.

GROUP is experimenting with the publication of yearly issues: GROUP 2020 Research Papers will be published as two issues of PACM, both presented at the same GROUP Conference, 6-8 Jan 2020. First Wave research papers will be out prior to the conference, and Second Wave research papers will be published in 2020, after the conference. Second Wave research papers will also be published as an issue of Proceedings of the ACM (PACM) journal.

There is no minimum or maximum length imposed on papers. Reviewers will be instructed to weigh the contribution of a paper relative to its length. Papers should report research thoroughly but succinctly. Shorter, more focused papers (Notes in prior years) are encouraged and will be reviewed like any other paper. Paper length should be commensurate with their contribution.

PACM uses the ACM Small article template, which is different from the traditional two-column SIGCHI papers template. The ACM Small template is available for download as part of the ACM Master Template. Please use the most recent version of the master template. Authors using the Overleaf platform can use the templates provided within Overleaf. Papers should be converted to PDF before submission.

Second Wave Research Paper submissions must be completed online at the GROUP 2020 conference submission site.

Important Dates:
=================
Papers Submission Deadline: June 21st, 2019 (no abstracts)
1st Round Notifications: September 6th, 2019
Resubmit: October 4th
2nd Round decisions: November 15th
Camera ready: December 6th

If you have questions, please contact the conference organizers:

General Chairs (chairs@group2020.org):
Lionel Robert, University of Michigan & Louise Barkhuus, IT University of Copenhagen

Papers Chairs (papers@group2020.org):
Ingrid Erickson, Syracuse University, Adriana S Vivacqua, Universidade Federal do Rio de Janeiro & Lars Rune Christensen, IT University of Copenhagen
Call for Submissions - SECOND WAVE Research Papers - GROUP 2020
ACM International Conference on Supporting Group Work
January 6-8, 2020, Sanibel Island, Florida, USA
https://group.acm.org/conferences/group20/

General Information
For over 25 years, the ACM International Conference on Supporting Group Work (GROUP) has been a premier venue for research on Computer Supported Cooperative Work, Human Computer Interaction, Computer Supported Collaborative Learning and Socio-Technical Studies. The conference integrates work in social science, computer science, engineering, design, values, and other diverse topics related to group work, broadly conceptualized. Group 2020 continues the tradition of being truly international and interdisciplinary in both organizational structure as well as participants.

Key goals for the program are to encourage and facilitate researchers within CSCW and HCI to interact across disciplinary boundaries. We encourage high-level research contributions from interdisciplinary groups to present work that might be difficult to place within one simple category. We are open to diverse and innovative research methods, and to contributions across broad areas such as systems, society, participation, critique, collaboration, and human interaction. GROUP 2020 in particular would like to encourage systems designers, builders, and researchers from industry, academia, government and other interested groups to participate.

Papers will now be published as two special issues of the recently created journal, Proceedings of the ACM (PACM). Accepted research papers (both First Wave and Second Wave) will be published in special issues of PACM. Papers have no fixed minimum or maximum page numbers, paper length should be commensurate with contribution. Second Wave Research Paper submissions must be submitted online at the GROUP 2020 conference site.

Conference Topics:
- Theoretical and/or conceptual contributions about key concepts relevant to CSCW and HCI, including critique.
- Social, behavioral, and computational studies of collaboration and communication.
- Technical architectures supporting collaboration.
- New tool/toolkits for collaborative technologies.
- Ethnographic studies of collaborative practices.
- Coordination and workflow technology.
- Social computing and contexts of collaboration.
- Online communities, including issues of privacy, identity, trust, and participation.
- Cooperative knowledge management.
- Organizational issues of technology design, use, or adaptation.
- Strategies for use of technology in business, government, and newer forms of organizations.
- Emerging technologies and their design, use, or appropriation in work, home, leisure, entertainment, or education.
- Learning at the workplace (CSCL at work, Technology-Enhanced Learning, TEL).
- Co-located and geographically-distributed teams, global collaboration.
- Cultural and cross-cultural collaboration and communication.
- Mobile and wearable technologies in collaboration.
- Innovative forms of human computer interaction for cooperative technologies.
